## OFS Precise HEAT

XP Chemistries produces capsaicin from forest based raw materials and have developed a new sustainable process for production of capsaicinoids with high purity. Based on our high purity capsaicinoids, we produce a ready to fill pepper spray mixture called OFS Precise HEAT. This product is sold to brand owners and pepper spray producers with their own spray filling equipment, who wants to achieve superior product quality in a cost-efficient way.

### Ready to fill pepper spray liquid:

- Exact content of Major Capsaicinoids, 1.33% verified by HPLC (other strengths available on demand)
- Clean safety data sheet without any H-codes or pictograms, see attached
- Non-flammable (flashpoint >75°C, >167°F)
- Low freezing point (<-23°C, <-9°F)
- Available with strong RED color and UV-dye to enable attacker identification
- Suitable viscosity
