

XPC Protect

XPC Precise RED

XPC Precise RED is a self-defense mixture that contains a strong red color and a UV dye to facilitate identifying the perpetrator.

XPC Precise RED contains no Oleoresin Capsicum or similar capsaicinoids, which makes the mixture legal in countries where pepper sprays are prohibited.

Precise RED's safety data sheet is without any H-codes or pictograms.

This product is sold to brand owners and pepper spray producers with their own spray filling equipment, who want to achieve superior product quality in a cost-efficient way.

Ready to fill self-defense liquid:

- Non-flammable (flashpoint $>75^{\circ}\text{C}$, $>167^{\circ}\text{F}$)
- Low freezing point ($<-23^{\circ}\text{C}$, $<-9^{\circ}\text{F}$)
- Available with strong RED color and UV-dye to enable attacker identification
- Suitable viscosity
